

What Could Your Brine Be Worth?

Not every brine is a goldmine. But when the chemistry and scale work - and the right partner can execute - your brine can become a real revenue stream. It becomes a real opportunity when three things line up:

- **The right chemistry** - lithium concentration and impurities support recovery and product quality
- **The right scale** - sufficient flow and volume to drive project economics
- **The right partner** - proven execution, integration know-how, and an aligned commercial model

	Illustrative JV Business Case
Feedstock	40,000 bbl./d /265 m ³ /h
Lithium concentration	125 mg/L
Lithium price	\$14,175
CapEx	\$26M
OpEx	\$3,647/t
Lithium production	1,200 tpa
Gross margin	74%
Revenue	\$17.1M/year
1-year result	\$12.7M
Payback period	2 years

Disclaimer: This example is illustrative to show the value logic. Actual outputs and economics are site-specific and must be confirmed through project-specific validation. Any pricing used in this business case is an illustrative assumption and is provided for modeling purposes only. The price assumption references the consensus price for the first revenue year as presented in the Lithium Harvest Investment Memorandum (2026). No representation or warranty is made regarding the accuracy, completeness, or future realization of any price, output, cost, or economic outcome.

Find a Partner Who Sees the Value in Your Brine

Getting into lithium doesn't have to mean megaproject headaches, years of piloting, or building a lithium team from scratch. With Lithium Harvest, you work with a partner that:

- **Targets top-tier project economics** - competitive CapEx and OpEx so more value flows to the JV
- **Brings a proven, patented extraction solution** tailored to produced water and other complex brines
- **Runs an aligned partnership model** - we design, build, own, and operate, and you share the upside
- **Thinks in your language** - value per barrel and value per tonne, not lab metrics and slideware

You enter the lithium space without the headache - and with a partner whose success is tied to the value we create together. **Want to see what that could look like for your operation?**
