

Project Manager

Are you an experienced Project Manager passionate about sustainability and innovation? Lithium Harvest seeks a skilled Project Manager to oversee large-scale lithium extraction facilities. This role offers the chance to lead impactful projects, manage cross-functional teams, and contribute to a sustainable future. If you are motivated, independent, and eager to leave your mark on a pioneering industry, we invite you to join our team in Aalborg, Denmark.

About Lithium Harvest

Lithium Harvest is the premier source for sustainable lithium extraction, focusing on providing high-quality, environmentally responsible lithium products to the fast-growing electric vehicle and battery markets. Our proprietary technology allows us to extract lithium from oilfield wastewater, minimizing our environmental impact and turning waste into a resource.

Job Summary

We are seeking an experienced Project Manager to join our team in Aalborg, Denmark. The ideal candidate will have extensive experience in managing large facility projects, particularly in water treatment systems. In this crucial role, you will be responsible for managing all aspects of current projects, developing project management guidelines, and ensuring the successful delivery of all projects.

Key Responsibilities

- Manage current projects, including large lithium extraction facilities, from bid phase to final handover.
- Oversee contract management, review cost estimates and quotes, and build project budgets.
- Develop and implement project management guidelines and protocols.
- Manage project costs and quality to ensure successful outcomes.
- Ensure timely and effective delivery of all project deliverables.
- Provide status and risk reporting to all stakeholders.
- Coordinate technical cross-functional teams to ensure project success.
- Participate in the Global Project Facility Team and collaborate with other team members.
- Involvement in purchasing and supply chain management.
- Build and lead the project team.
- Travel as required (approximately 30 days per year) to support project needs.

Qualifications and Skills

- Minimum hold a Bachelor's degree in Engineering, Project Management, or a related field.
- Minimum of 10 years of work experience, with at least five years documented experience in similar projects.
- Extensive experience in managing large facility projects and water treatment systems.
- Strong contract management and budget-building skills.
- Excellent leadership and team-building abilities.
- Proficient in status and risk reporting to stakeholders.
- Experience in technical cross-functional coordination.
- Self-motivated, independent, and proactive in daily operations.
- Must be living in Denmark.
- Fluent in English.

Work Environment

- This role is based in our office in Aalborg, Denmark.

What We Offer

- Competitive salary based on experience and benefits package.
- Professional development opportunities.
- A collaborative culture that values each member's contribution towards our shared goals.
- Flexible working hours and remote work options.
- Nice office in Aalborg with lunch arrangement

Application Process: Interested candidates should forward their CV and half a page about their motivation for working at Lithium Harvest and what difference they can make to career@lithiumharvest.com. Please include any relevant project experience or skills that align with Lithium Harvest's mission and technologies.

Questions: For further inquiries, please contact us at career@lithiumharvest.com.

Application Deadline: August 19, 2024

Start Date: As soon as possible

Equal Opportunity Statement: Lithium Harvest is an equal-opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees.

Company Culture and Values: At Lithium Harvest, we value innovation, sustainability, collaboration, and a multicultural working environment. We strive to create a positive and inclusive workplace where every team member can thrive and contribute to our mission of sustainable lithium extraction.

Join us at Lithium Harvest, where your contributions can help shape the future of sustainable lithium extraction and accelerate the green energy transition.
